

SUSTAINABILITY SURVEY 2014

NBS have carried out their second survey into sustainability and the attitudes and practices of construction professionals. This year's survey ran from May to June in 2014 and attracted respondents from a range of disciplines.

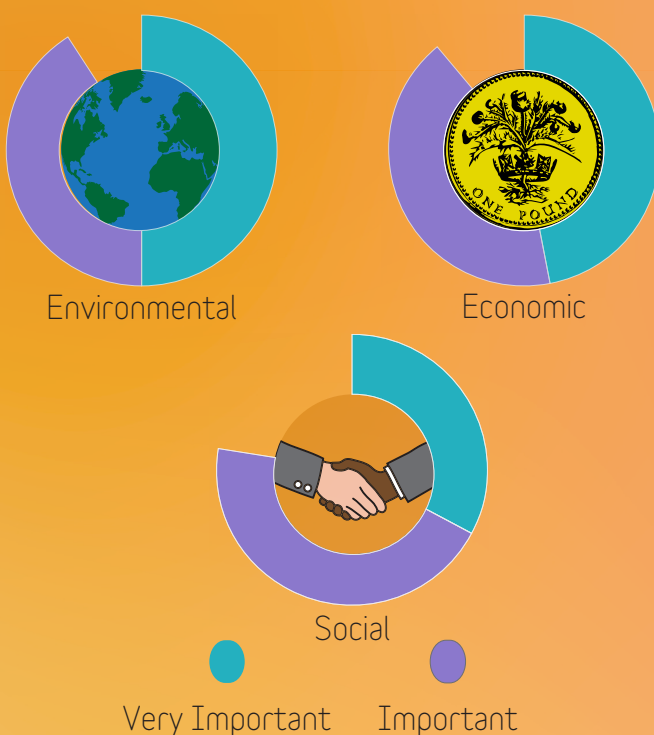

Respondent Breakdown
72% Consultant (such as Architect)
20% Contractor
8% Client

Thinking about your organisation and sustainability, do you agree with the following statements?

Generally how important are the following aspects of sustainability to the projects you work on?

"Sustainability has three dimensions: social, economic and environmental, and sustainable decision-making must balance all three. Sustainability can be considered to be the destination. Sustainable development is the journey"
-Survey Respondent

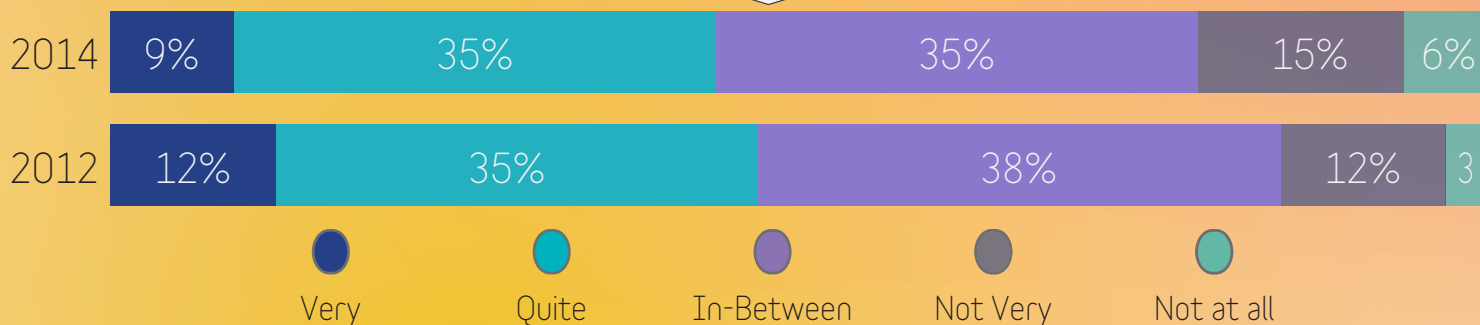

Thinking about specific elements of sustainability, how important are the following aspects of sustainability to the projects you work on?

"Some of the biggest improvements in sustainable design will come through developments in information use"

Richard Waterhouse
CEO,
NBS and
RIBA Enterprises

How confident are you in your knowledge and skills of sustainable design?
